

Item number	Comment			
1	I feel it is one of the important objectives but not the most important.	blank		
2	Dream! But prepare for this by putting areas where it is acceptable	blank		
4	Aren't most of these subject to state regulations	blank		
	I don't believe we need all this control in a free country!	blank		
	Rural residents and vacationers.	blank		
	Depends upon the plans and long term goals for the residence of Barrington	blank		
	I'm not sure how the answer affects what you do.	blank		
	Is it necessary to change the rural character we have?	blank		
	You need a plan for any and all of these	blank		
	Doing all right as is	blank		
	If possible please do not plow snow into driveways	blank		
	We don't know enough about current services to comment.	blank		
	We needs more funds!	blank		
	Regulations already exist for all of these. Town regulations increase town liability!	blank		
	All of the above	blank		
	Control numbers of boats per resident - only one dock per 60" abandon trailer parks and mobile homes resident s who use the lake for profit should be taxed accordingly - camp Cory for example	docks	taxes	land use
	Building of boathouses / structures on and out onto lake Keuka need to be much more closely regulated as they restrict views etc.	docks		
	Stop allowing the building of permanent boathouses out into the lake. Blocks the lake view for neighbors.	docks		
	Permanent docks	docks		
	No more large pig farms that is a disaster limit pwc use on Keuka to odd days only limit any development on hillsides above Keuka	environmental	land use	other
	Comments form second family member: Highway crews and landowners (specifically farmers) should utilize ecological and conservation practices to diminish erosion, runoff, flooding and preserve wet land and natural resources; roadcrews and highway superintendent should have engineering and conservation experience or education; would like to see improved junk, farm machinery, and unregistered vehicle enforcement. Thank you for requesting our input good luck with your plan.	environmental	roads	junk
	SEWER	environmental	services other	
	We need water and sewer. It is a disgrace that the town is being "held hostage" by the threats 2-3 larger scale residents. The subjects of water and sewer should be reopened and voted on again, with the actual facts made public and not a lot of dis-information published.	environmental	services other	
	Thank you for you continued attention for preserving our "jewel". Getting a water / sewer district is my first concern; this would enable Keuka lake to remain a place that my children and their families could enjoy for generations.	environmental	services other	
	Support - water quality on Keuka lake, limit boat traffic, restrict any commercial fishing on Keuka lake, water. Sewer and gas to all cottages to improve quality of life and roll on taxes	environmental	services other	
	Sewer and H2O needed on lake residents need to pay their own	environmental	services other	
	Provide water and sewer to all residents	environmental	services other	
	Sewer system to protect the water quality of Keuka Lake, which is one of the primary assets and attractions of Barrington and surrounding towns.	environmental	services other	

Used motor oil disposal needed. Snow removal is excellent - keep up the good work! Can we please get DSL for internet access? Is there an alternative to Frontier - since they do not cover our area?	environmental	services other	
Toxic waste day for paints, insecticides etc.	environmental		
Protect the watershed	environmental		
Avoid any pollution of water - no pig farms	environmental		
Keep it country, no pollution	environmental		
No intensive farming of pigs, due to pollution and quality of life concerns.	environmental		
w/ agricultural - environmental impact critical.	environmental		
Large livestock, ban them. Recreation vehicle storage, if licensed no issue. Trash and "light spillage" pollution; commercial signage.	environmental		
Quality of lake water.	environmental		
"View protection"	environmental		
Protect the farmers and promote more farm friendly judgments.	environmental		
Wetland- state regulates you no choice	environmental		
This community was always family oriented - I don't think big business shouldn't push out the farmers and should promote better relationship with them - we can help them to establish better ways to save our water and make the land more productive - I believe that most of our neighbors are trying to do this.	environmental		
Any operation which might destroy the purity or scenic qualities of the lake	environmental		
Preserving trees, dog kennel waste preventing runoff into lakes	environmental		
You need to create good jobs	jobs		
Industry	jobs		
To provide for and direct managed growth for the town that takes into account the need for employment for the youth. Agriculture requires fewer and fewer people due to productivity and mechanization. Small business should be encouraged along with tourism. The town will remain rural because there is nothing to attract large businesses job availability is essential to prevent the town from declining into a senior citizen community.	jobs		
Need small to medium sized industry	jobs		
Diversification is essential to encourage growth and help our young people find well paying jobs	jobs		
Attracting business to bring good paying jobs to your area	jobs		
If this town is to prosper then it needs industry to create of making a living and earn a living wage, without traveling long distances	jobs		
With the qualification that this does NOT allow for junk or garbage build up! (This certainly <u>is</u> the situation now!)	junk		
The 2) unregistered vehicle reg. I think should be modified in accordance with lot size, general appearance of property, and mobility of vehicle.	junk		
Perhaps an overall plan so that people who build will not find their location spoiled by upcoming development. A statement and map for all residents and people who are hoping to become residents. Recognition of the fact that every farm is in essence a business and must be treated as such. Many state regulations already exist. A more comprehensive list of site requirements for new buildings. Could large pig, cow numbers be limited to a given number per acre - these numbers are probably available from Cornell.	land use	environmental	
More strictly enforce those zoning and code ordinances that already exist. Lack of enforcement implies no new issues will be adhered to anyway.	land use	environmental	

	With increasing Mennonite population, the town planning board should consider regulations to more closely control "family businesses" that are set up and run as part of a farm operation. The board should also consider regulations to control "light" pollution - family businesses where security lights cause glare along our highways - Crystal Valley Produce	land use	environmental	
	Lake properties - frontage - access and view - should be our main residential growth - 14A commercial - rest agril agr use; people come here for the lake and rural setting: Your future should be to keep it that way. Agriculture cannot fund services needed for residential uses.	land use	rural character	objective
	I live in NJ but own 26 acre in Barrington. I want to live the rest of my life in Barrington. I enjoy the Mennonite people. It is so beautiful wide open space. Make it so that you have to buy at least 5 acre to build one no townhouse never.	land use	rural character	
	Please be aware that as agriculture fails the farmer's 401K is to sell his land. No one wishes to have his or her 401K messed with	land use	taxes	
	Changing zoning regulations to enhance residential property and discourage future agricultural advancement by group that primary use infrastructure paid for by others	land use		
	Consider route 14A for light industrial development its a state highway	land use		
	Closer supervision and inspection of buildings to conform with permit limitations.	land use		
5	The town would be more desirable if a site on the lake was available for future use.	land use		
	A balanced land usage, include agricultural industrial, plus, well designed multiple housing developments for healthy seniors.	land use		
	Insure that changes to property enhances the overall value to the entire town.	land use		
	Rural character can be maintained 5 ac lots	land use		
	Would like to see "rural character" preserved as much as possible But with so many people?	land use		
	Planned, controlled growth in keeping with the rural and recreational character	land use		
	Develop a plan for mixed uses: recreation, residential, and commercial along route 14A.	land use		
	Also needs recreational development.	land use		
	Development should be evaluated on a case by case basis.	land use		
	1.5 acres for three dwellings for planned developmental district.	land use		
	How does balanced land use fit with previous question?	land use		
	Should be strictly zoned to maintain rural atmosphere	land use		
	Hunting and recreation	land use		
	Please do not let it get overcrowded	land use		
	Hunting and recreational 8 months per year	land use		
	Look carefully at 5th amendment of US constitution regarding landowners rights. I do not want to see Adult entertainment in area, but question right to prohibit this of owned by landowner.	land use		
	Lake development	land use		
	Hunting camps for paid hunting.	land use		
	Landowners do have rights! To use their own land to make a living not have new neighbors tell them what to do.	land use		
	Farm land	land use		
	Cemeteries	land use		
	Provide for planned use of these areas - permits	land use		
	A small town center like a mini- Hammondsport.	land use		
	Lake view development must be closely controlled regarding lot size (min 5 acres) and square footage 2,000 min single story 2,500 min two story one look at Conesus lake development will prove that this type of zoning is necessary to preserve Keuka Land and its surroundings.	land use		

We began living part-time in the area 20 years ago, and purchased a farm 15 years ago. We are very concerned about the subdividing of agricultural into small lots for mobile home development and the potential for subdivision development. We would be happy to volunteer to serve on a committee for the comprehensive planning process if you are looking for volunteers.	land use		
Planned developments - 5 acres per dwelling minimum. Do not deface the bluff or the surrounding hillside. It's part of the beauty .	land use		
Limitations of square footage for summer residents on Keuka lake building far too big for recreational summer homes.	land use		
In my opinion you need to enforce the rules you have. Drive around, there are buildings everywhere that don't meet codes and probably have no permit. It cost the person who follows the rules a lot of money otherwise, I feel it is a pleasure to live in Barrington, nice work.	land use		
Should be a zoning and planning board to monitor development in the town	land use		
Long ago I was taught that slippery slope at south end of Bluff Point was in the town of Barrington, where a couple of operatives put in a pier and dockage for house boats and the code of the town of Jerusalem	na		
YES: keep Realtors like "Buckey Lane" out! They only hurt the residents while they line their own pockets without care / considerations for others.....	na		
Control is not the right word to use in a free country! Don't like the word CONTROL! Used so freely!	na		
Excellent questions for major performance.	na		
Thank you for asking	na		
Disbanding almost everything listed is covered by another government agency	na		
You would get more people to answer this if you include a stamp	na		
Don not attempt to over manage in the next 5 to 10 year period - set goals but go slowly with regulations building codes should be high on the priority list zoning should provide for the growth of businesses and light industrial development some tax incentives should be considered.	objective	land use	jobs
I believe planning board should take a hands-off position. "Most landowners will do better if not strapped by big towns trying to meet the codes, in improving their lots. This is a relatively poor (financial) area. Heavy restrictions reduce what owners can afford to build. Insurance and mortgage companies will dictate minimums.	objective	land use	
Growth equals tax base equals lower property taxes for you and me. Growth also bolsters the boards relevance and importance to the people. Manage it, but let it happen.	objective	taxes	
Keep Barrington from becoming a "resort".	objective		
Good management.	objective		
I think the "character" will develop and your job is to prepare guide lines to protect residents and allow for growth.	objective		
Provide a town that encourages strong families by being economical, active and safe.	objective		
Make the town a more desirable place for a broad range of people to live.	objective		
To improve the quality of life for those living in the town	objective		
The plans primary objective should be to manage and promote growth that is in keeping with the rural character. Growth that promotes jobs and property appreciation for all (not just lake front owners) and widens the tax base	objective		
Keep our town farm lands and respect our individual rights.	objective		
Anything that improves the appearance of our town	objective		
Please do not let it get overcrowded	objective		

	Thank you for asking our opinion. Civil rights, individual freedom and comprehensive land use planning can go hand - in - hand. Understandable, enforceable regulations, "bought into " by the citizens are essential.	objective		
	Suggest town meeting be held sometime in July 05 while in the planning Board could communicate with both residents and non residents of Barrington. Discussing goals and the specific actions that would meet such goals - for example how to keep Barrington rural.	objective		
	Balance efforts to protect and develop the town	objective		
	What are the implications of construction, property values and taxes on planning board decisions.	objective		
	Be honest and fair to residence in area.	objective		
	To continue growth but preserve the area	objective		
	How does the town define it's "ideal state" in the future? What will be the term used to define our towns "character"?	objective		
	Disband - Yates county should consolidate all towns, villages and county govt. into one serving 24,000 Yates county residents - YC has too much government!	other		
	Tourism development - parks trails.	other		
	More cell towers	other		
	Some code to prevent neighbor harassment	other		
	Dog control - lease law not enforced.	other		
	Puppy mills	other		
	Long term care facility medical facility in Barrington	other		
	Please consider school bus safety in any future developmental issues.	other		
	More diverse dining areas and maybe a movie theater	other		
	Barrington needs to control transient rentals: occupant safety, parking, noise, garbage, septic overloads, maintain quality of life issue along Keuka Lake. This is also an excellent opportunity to help us collect tax and / or fees	rental	taxes	environmental
	Rental properties on lake - Too many people for size of cottage (with rents so high 2 - 3 families have to share rent. And then each family brings their dogs which are allowed to run free. There are state laws in effect for the number of people allowed to share one dwelling - ENFORCE IT	rental		
	Rental property policies	rental		
	Short-term cottage rentals	rental		
	More closely regulated and policed rental policies.	rental		
	Speed bumps on the lower lake road. Sprawl must be prohibited or it will drive out long - type families of modest income and will destroy arable land . Tighter supervision of septic systems is needed. "Footprints" on lake property must be enforced. Annual re-assessments are screwing lake front owners who have no vote.	roads	land use	environmental
6	I feel roadside ditching is extremely important if we are to maintain and improve our town roads. Do not establish controls just to establish controls - good common sense will go a long way in helping with many issues.	roads		
	Repair other half of Andrews Hill Road (there is always pothole and big frost heaves and can throw vehicle off road)	roads		
	Prohibit steel wheel tractors on paved highways increase run-off as farms clear land > flood control	roads		
	When roads are paved dress the shoulders instead of leaving a 6 to 12 inch drop-off	roads		
	On road condition - pay visit to me - we have much to say	roads		
	The roads are a disaster a lawsuit waiting to happen	roads		
	Prohibit steel wheel tractors on paved highways. Enforcement of unregistered vehicles is lacking.	roads		

	Runoff water trenches	roads		
	Adopt a long term policy to have gravel roads properly graded	roads		
	Better road maintenance. In the two years I've owned property in Barrington I've not seen any Barrington highway maintenance on my section of the highway after being promised road improvements and installation of a driveway culvert.	roads		
	The residential developments are growing fast on the Knapp road. The road has been in terrible shape for a long time.	roads		
	The road Andrews Hill is not maintained properly drainage is poor and the ditching is very poor along with ht grade work water cannot get into ditches especially the top areas at Bill Bailey	roads		
	Keeping the rural areas rural.	rural character	objective	
	No casinos	rural character		
	Penn Yan Barrington is FARM family community keep it that way	rural character		
	Ag acres	rural character		
	Agricultural farmland	rural character		
	We are new owners on Keuka Lake. Our opinions are not based n long term knowledge. We like the character of the lake and in general would like to see it remain as is.	rural character		
	Although future development is inevitable, I would like to see the town of Barrington escape over development I would like to see the rural agracultural flavor of the town preserved as much as possible!	rural character		
	Garbage and garden debris pickup	services other		
	We really need water, sewer and natural gas to help pay for this we need to attract more homeowners and businesses to Barrington	services other		
	Recruit industries to come into the area to help alleviate our (the lakers) very large tax burdens. Help NYS pass a law similar to the one in CA that doesn't penalize the locals just because a "stranger" is willing to pay a ridiculous price for lake property. Re-val should be done every 3 years (like other towns / cities). They are not penalized by the state. Barrington Board is gouging the lakers by doing re-val every year. When property is assessed high, you get less money from the state.	taxes	jobs	
	No only allowing but encouraging the development of light industry and commercial properties would help lighten the tax burden on residential areas. Less regulation is preferred to more regulation. We have enough.	taxes	land use	
	Lake residential property is already very restrictive. Subdivisions and complexes may be required since lake property taxes are increasing at such an alarming rate.	taxes	land use	
	Public access site to Keuka Lake, eg beach, boat launch, etc. for non-lake residents Broadening tax base to relieve lake property owners, eg light and clean industrial and commercial development	taxes	objective	jobs
	Factor in the high cost of living here.	taxes	objective	
	Controlling and taxation of unregulated businesses in the town ie rental properties	taxes	rental	
	Petition Yates County for sales tax relief. Our business generates 40 - 60 K each year but receives "no" benefits. No sewers, not public water, no road maintenance (county) no cable, not fair!	taxes	services other	
3	We pay the most taxes and get nothing!	taxes		
	The most important objective would be to find a compromise of business and residential planning in order to keep taxes reasonable.	taxes		

Economic stability not dependent on lake shore owners.	taxes		
Residential development to broaden the tax base to ease the burden on lake residents.	taxes		
Increase the tax base so that the lake front owners do not have to pay the majority of the town / county taxes.	taxes		
More commercial property to help with taxes and no school childrer	taxes		
Reduce taxes; maintain appearance	taxes		
Stop the Mendanites from buying all the farm overpaying 2 - 3- 4 times the market value which drive up other farms assessments	taxes		
Water / sewer on Lake Road. Our taxes increase each year. What service do we get for our taxes?	taxes		
Lower taxes for lake property	taxes		
Keep taxes for lake property in balance. Lake assessments are becoming far too high and receive few services for them.	taxes		
Clean tax revenue generators	taxes		
Why do we assume taxes will go up? Maybe we should reevaluate current priorities	taxes		
Maintain minimal or no tax increases. Taxes are already very high considering services received.	taxes		
We have a small 1 bedroom, 1 bath seasonal cottage, and each year our taxes increase. We have made no major improvements in the 17 years we've owned the place. Does the assessor actually visit properties to establish the assessment?	taxes		
Most anything within limits to reduce the tax burden on lake property owners.	taxes		
Annual reassessments. I believe all properties should be properly assessed. Continually raising the town values, especially lake front property , just causes our property owners to pay a larger percent of the county and school taxes, because the other areas are not reassessing!!!!	taxes		
Control high taxes so as not to drive residents from the lake	taxes		
Property owner, including seasonal should be able to vote on taxable issues - re. Schools, representation.	taxes		
Escalating assessment are going to "drive" little income tax payers right off Keuka Lake	taxes		
The tax burden to lake residents is becoming intolerable. People should not be forced to sell their homes because they cannot pay taxes that are used to support services primarily by hill residents	taxes
