

CLEAN ENERGY COMMUNITIES 2.0 LEADERSHIP ROUND KICKOFF EVENT

MARCH 10, 2021

6:30 P.M.

Across the State, local governments are striving to create a healthy and sustainable environment by investing in future-focused clean energy solutions for their community, while at the same time facing unprecedented societal and financial challenges.

NYSERDA's new Clean Energy Communities Leadership Round provides the resources and funding to help local governments successfully execute and achieve those goals.

The Leadership Round provides more opportunities for municipalities to improve their community, access increased grant funding, and earn recognition. With continued coordinator support and guidance for implementing high-impact clean energy actions, you have a clear path to building community-wide resiliency and economic opportunity.

Please join Rob Richardson, CEC Coordinator, and Jenny Loewenstein from the Genesee/Finger Lakes Regional Planning Council (G/FLRPC) for this webinar to learn how your municipality can benefit from becoming a Clean Energy Community.
