

Energy Code Enforcement Training

Wednesday, April 03 2019, 8:00 AM - 4:00 PM

*DOS, PE, and other CE unit hours

ABOUT THE EVENT

Enforcing the Energy Code is an interactive workshop on enforcing the Energy Code through plan review and on-site inspection. For the plan review portion of the course, attendees will work in small groups to troubleshoot compliance using mock plans and specification typical of residential and commercial building permit applications. A training instructor will facilitate discussion and lead question and answer.

Both the Residential and Commercial sessions must be registered for and attended to qualify as completion of a Clean Energy Community High Impact Action.
